Customer Premises

FiOS Internet Status

**Verizon Expects To Attract Up
To 7 Million FiOS Internet
Customers By Year-End 2010 –
A Penetration Rate Of 35 - 40
Percent**

Broadband Subscribers (M)

FiOS Internet

SPEED*
(Mbps)

5/2
10/2

- Email, web serving
- Migration for dial-up user

15/2
20/5

- Multiple PCs and users
- Work from home

20/20

- Multiple PCs and users
- Avid online gamers
- Work from home

30/5
50/5

- Receiving and sending very large files (e.g. animation and graphics, high-resolution photos/videos)
- Early adopters

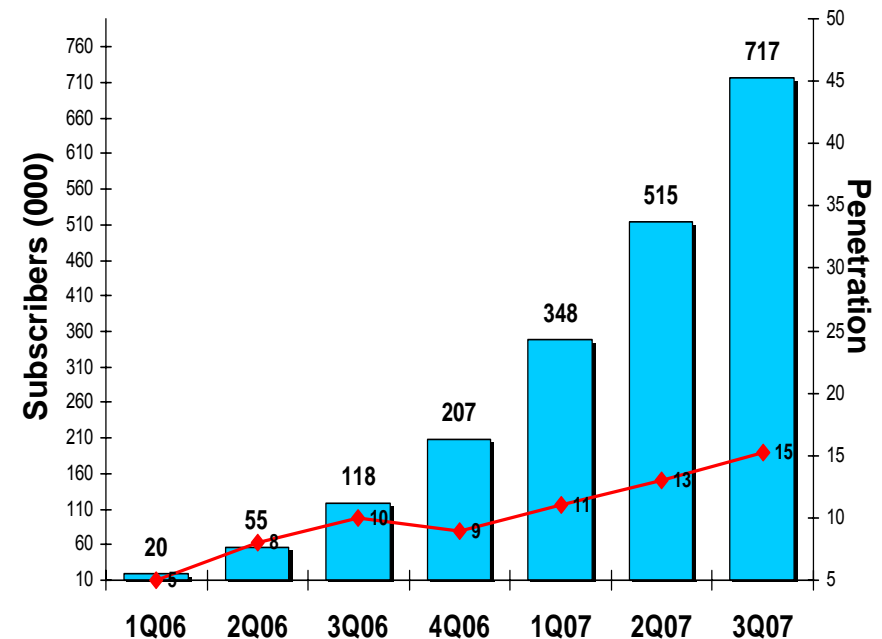

*New higher speeds of 10/2, 20/5, 20/20 and 50/5 in NY, NJ & CT.

FiOS Video Status

FiOS TV – On September 22 Of 2005, We Introduced Our First Broadcast/Interactive Video Product

- ▶ As Of Sep 30, 2007 Verizon Has Over 717,000 Video Customers
- ▶ During 3Q07, 202,000 New FiOS TV Customers Were Added
- ▶ We Are Adding 3,200 New Customers Per Day
- ▶ We Expect Around 3-4 Million FiOS TV Customers By 2010, Or A 20-25% Penetration Rate

FiOS Video

Great Value for the Consumer...

**More Choices.
Right Before Your Eyes.**

- **100% Digital**
- **~ 330 Channels**
- **Two Dozen + HD Channels**
- **100% VOD Capable**
- **6000 VOD Titles**
- **120 Hour DVR**
- **Advanced IPG**
- **Simple, Compelling Packaging**
- **Genre-Based Channel Line-up**

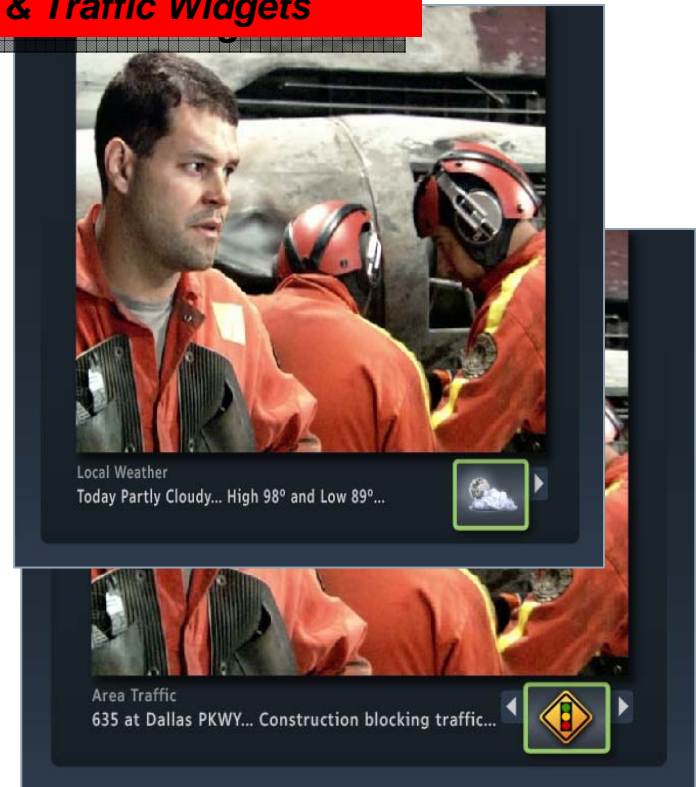

... and it'll Keep Getting Better

Widgets

FiOS TV Widgets Is An Interactive Application That Supplies Information Services Formatted For Television.

- “One Touch”, On Demand Access
- Non-Disruptive To Viewing Experiences
- Easy Navigation (i.e., Arrow Keys)
- Real Time, Hyper-Local Information

Weather & Traffic Widgets

Multi-Room DVR

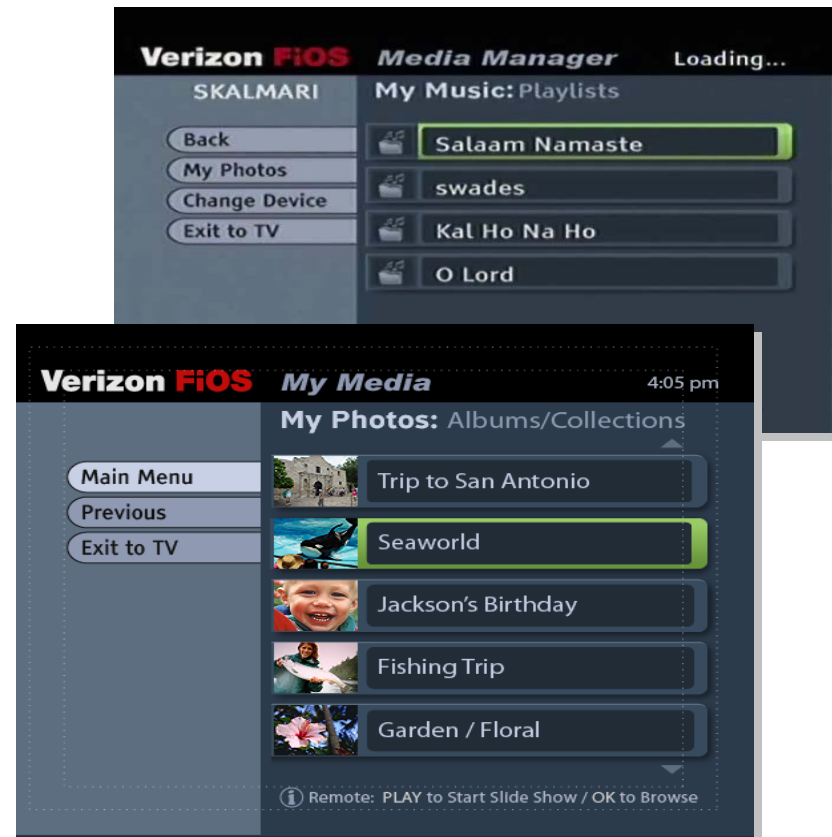

- **SIMPLE**
 - Eliminates Need For Multiple DVRs
- **FLEXIBLE**
 - Pause Program In One Room, Continue Viewing In Another
- **CONVENIENT**
 - Watch Recorded Shows On Multiple TVs
- **EFFICIENT**
 - Save Money By Having Just One DVR

Media Manager

My Music / My Photos

- Pictures and music are streamed from a PC to the Home Media DVR
- Customers access the Media Manager service through the “enhanced TV” section on their IPG main menu to view photo albums and play music

FTTP BPON/GPON Access Network

Video Evolution

Phase 1

- VHO = Conventional Technology
- Broadcast Video On Overlay Wavelength
- VOD Via IPTV

Phase 2

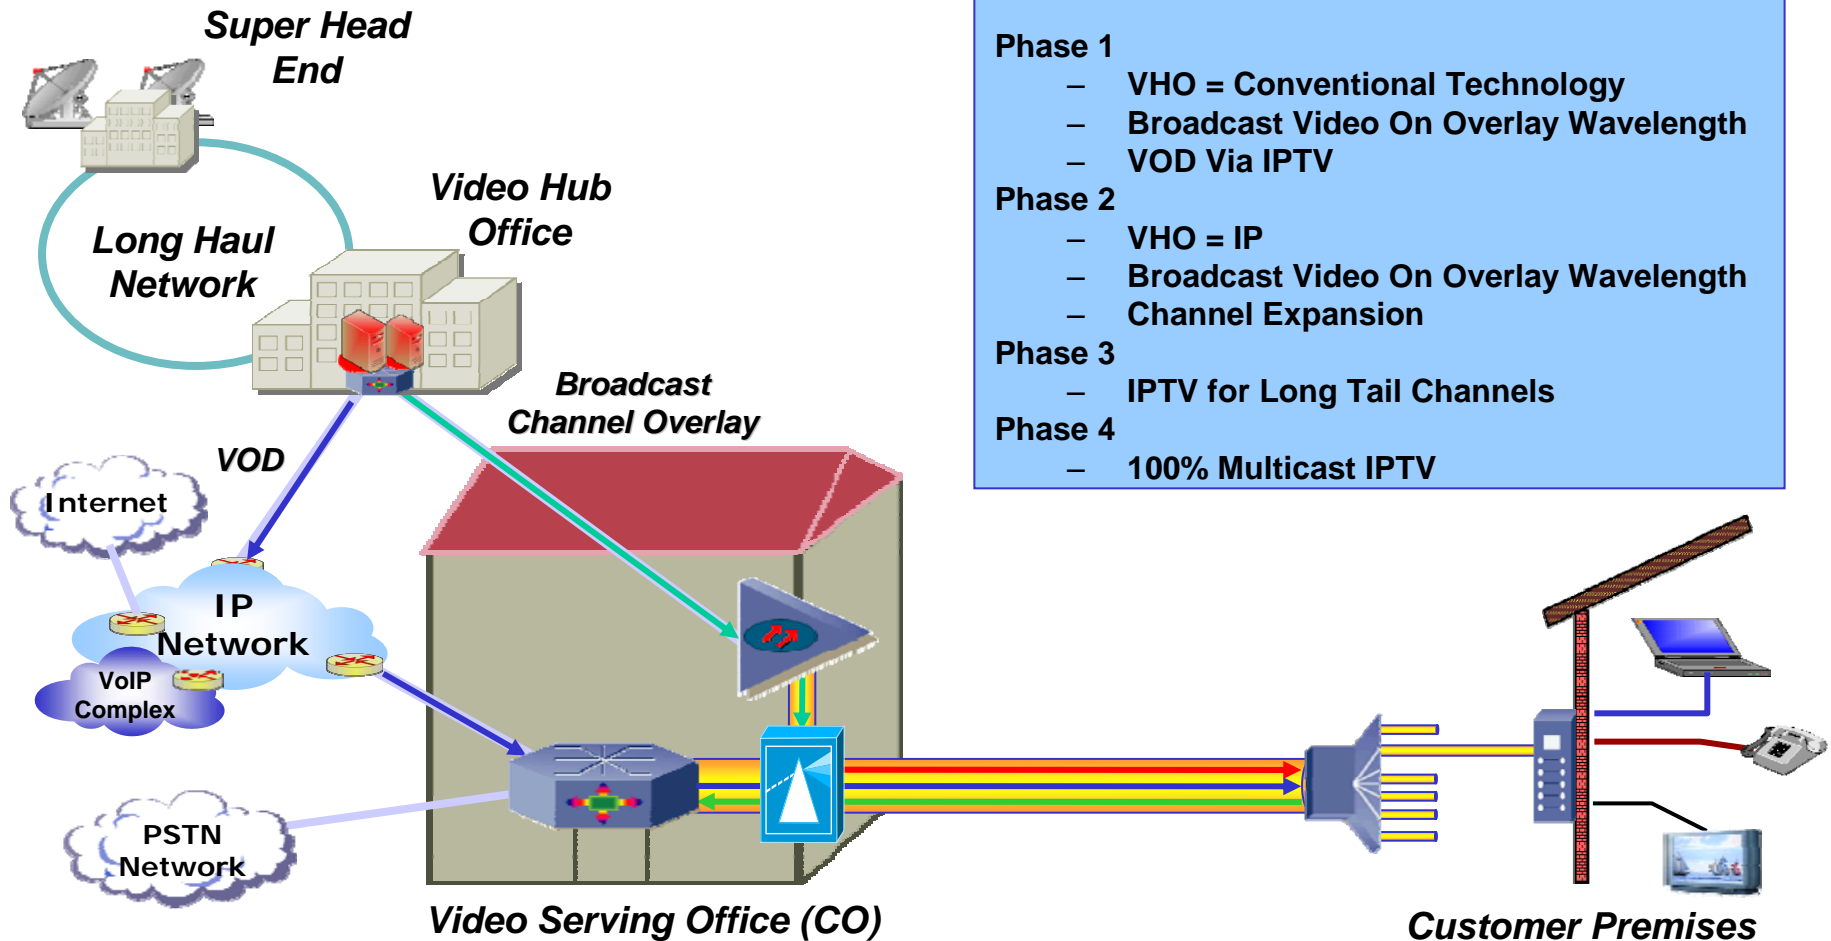

- VHO = IP
- Broadcast Video On Overlay Wavelength
- Channel Expansion

Phase 3

- IPTV for Long Tail Channels

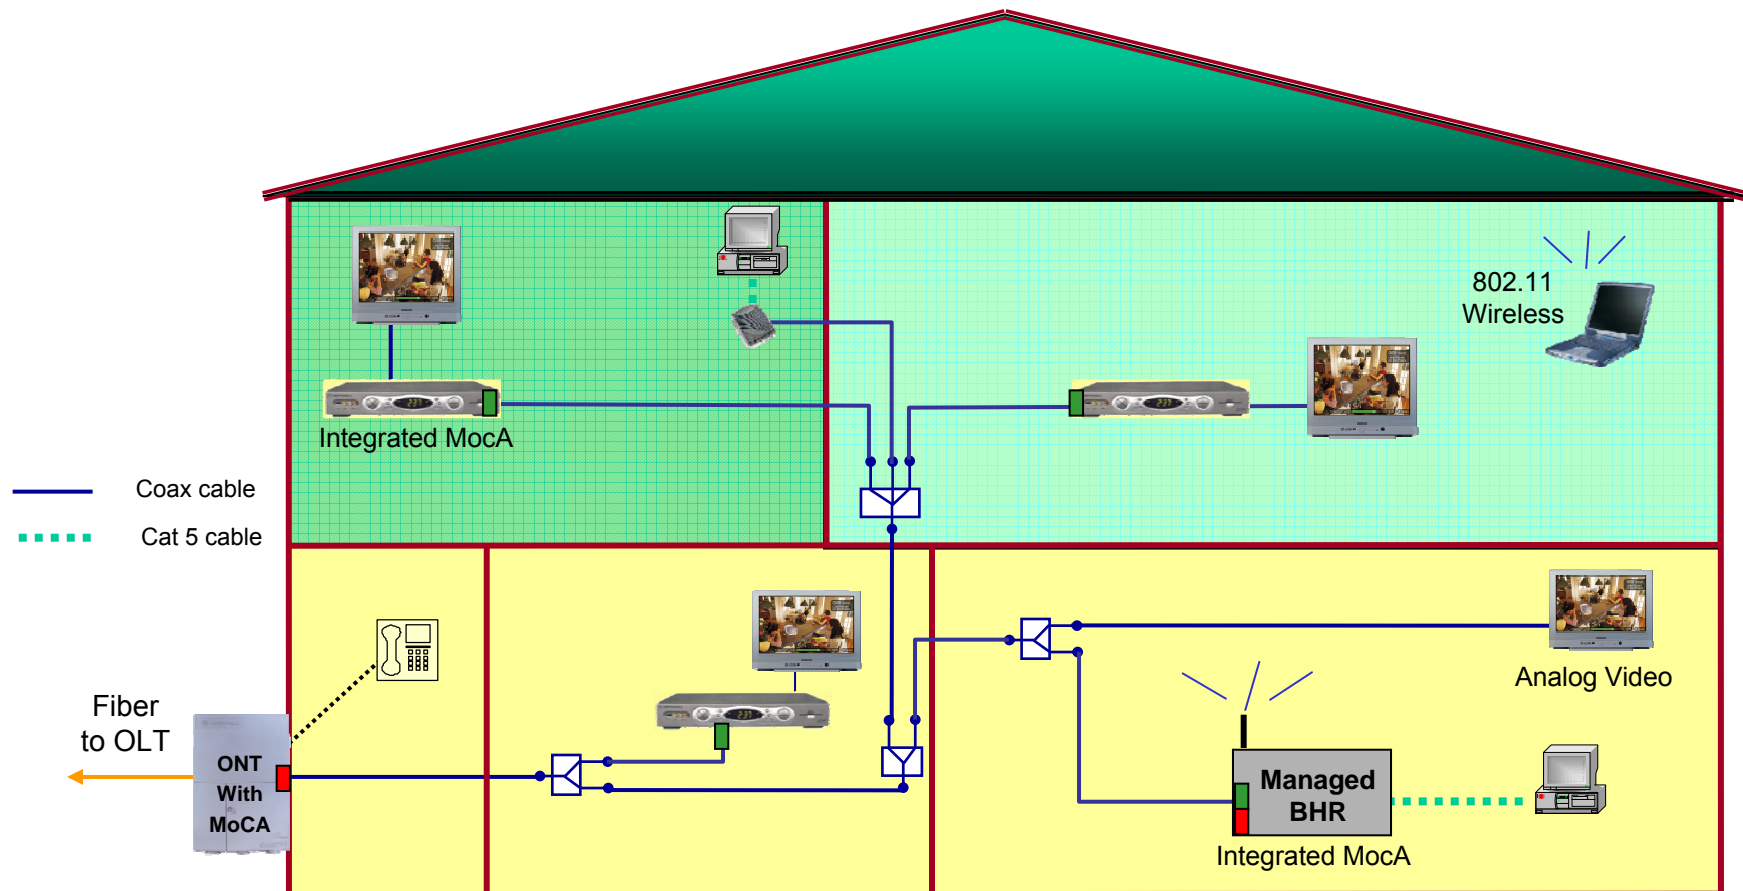

Phase 4

- 100% Multicast IPTV

MoCA in the FiOS Home

- ♦ MoCA Technology Incorporated In Verizon's Optical Network Terminal (ONT), Set Top Boxes (STBs), And Broadband Home Router (BHR)
- ♦ Dual Channel Operation Over The Same Coax Infrastructure - WAN/LAN Separation
- ♦ All IP Traffic, ONT-to-BHR (WAN) And BHR-to-STBs (LAN), Carried Over MoCA/Coax
- ♦ Optional Use Of MoCA Dongles For PC Connections

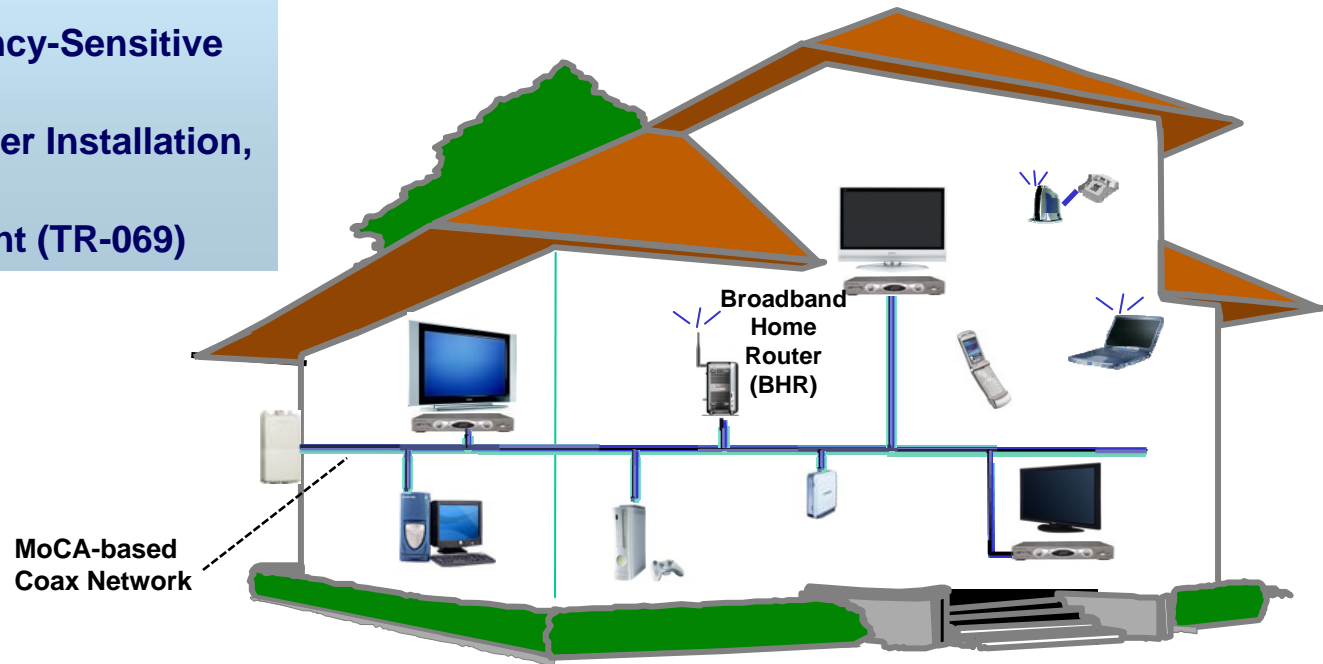

The Verizon Managed Home

CMS
Customer Premises Management System

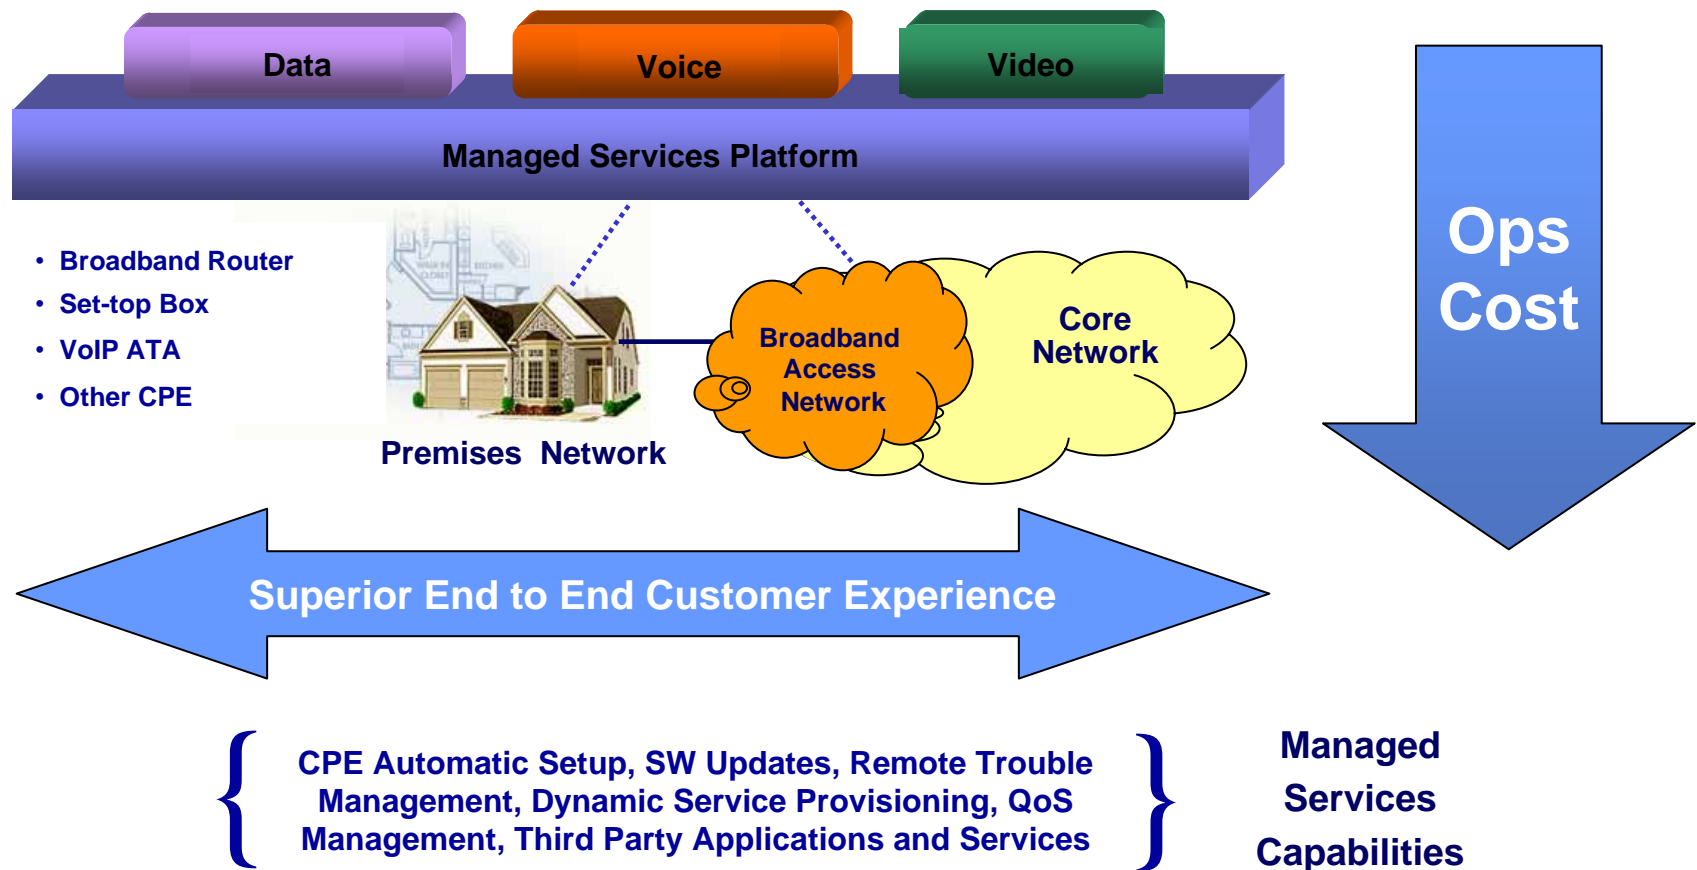

TR-069 Home Network Management

- High Throughput: 100 Mbps,
- Ready For Next-generation Offerings
- Protection for Latency-Sensitive Services
- No New Wires: Faster Installation, Lower Cost
- Remote Management (TR-069)

Robust Broadband

**Provide A Superior Service Delivery Experience And
Simplify Operations**

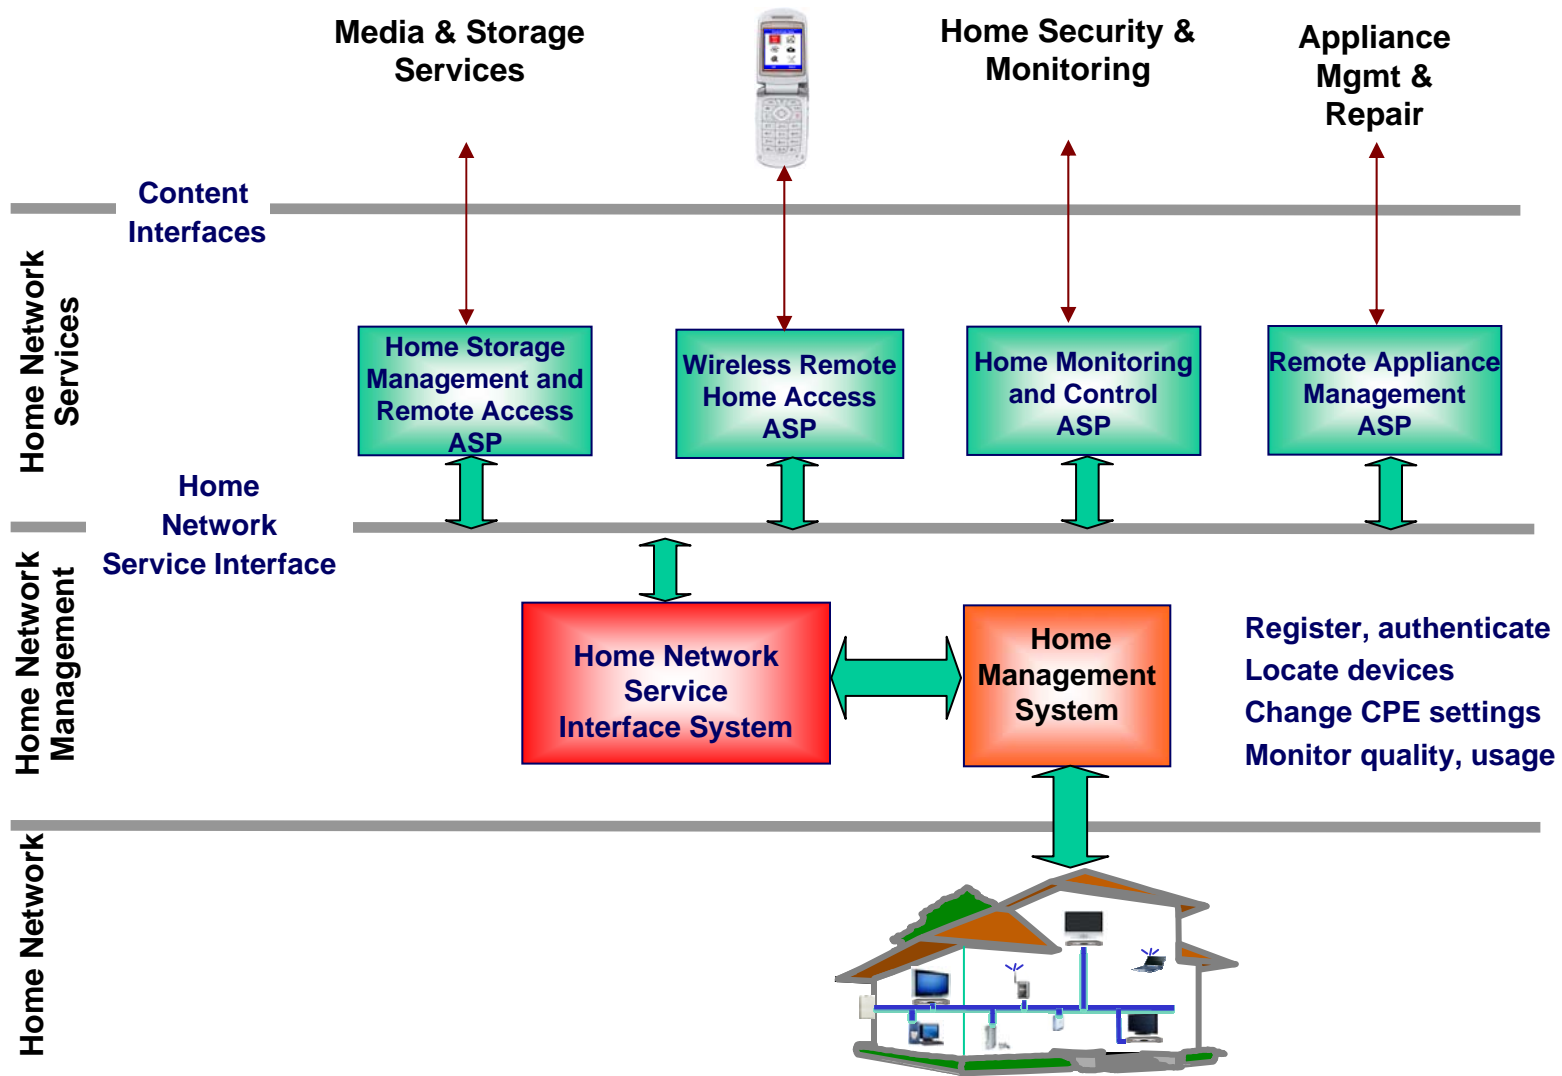

Service Delivery Opportunity

- **Verizon Is Making A Significant Investment In Broadband Infrastructure**
 - The Home Network Is Emerging As A Key Part Of This Infrastructure
 - It Is In Verizon's and Our Customers' Best Interests To Leverage Infrastructure For New Value-Added Services
- **Home Network Installation, Operation, Device Plug-and-Play Has To Be Transparent To The Customer**
 - Customers Want To Enjoy Services Without Having To Deal With Complexity
- **In Order To Guarantee A High-Impact Customer Experience We Need:**
 - Software/Firmware Downloading
 - Remote Management Of Applications And Devices
- **Opening The Platforms To Third-Party Application Service Providers Might Enhance This Opportunity**

Home Network Enabled Services

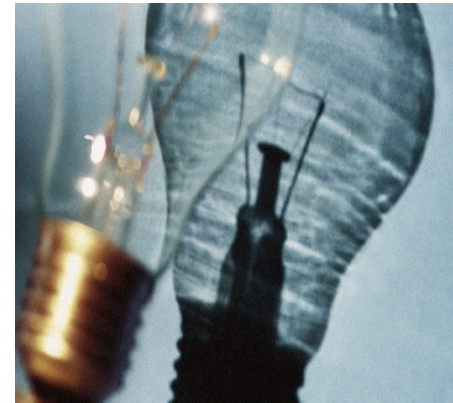

Service Structure

Areas of Innovation Enabled by IMS

- **Device Independence**
- **Network Independence**
- **Blended Services**
- **Presence & Location Awareness**
- **3rd Party Mashups**
- **Real-Time Bandwidth/QoS Control**

MoCA Installation & Performance

- ◆ **Verizon's FiOS Home Network Plays A Critical And Differentiating Role In Its FiOS Service Offerings**
- ◆ **More Than 700,000 FiOS Video Subscribers Using MoCA Today**
- ◆ **More Than 3 Million MoCA Nodes In FiOS Homes**
- ◆ **MoCA Allows Verizon To Reuse Existing Coax Cables, Splitters, And Connectors**
 - Reduces Installation Time
 - Minimizes Customer Disruption
 - Allows Customers To Easily Relocate Their BHR Or STBs By Connecting Them To Any Coax Outlets In The Home
- ◆ **Reliable And Predictable Performance**
 - Mature Technology Proven Through Verizon's Mass Deployments
 - Backed By Extensive Lab And Field Testing
 - Positive Feedback From Verizon Technicians And FiOS Customers About Technology Resiliency

The Future of MoCA

◆ **The Need For Additional Bandwidth In The Home Will Continue To Increase With Future Services**

- Gaming
- Higher Internet data tiers (Up to 100 Mbps)
- Long tail IP content – Expansion channels beyond once carried over overlay
- Full IP TV

- Network DVR
- Peer to Peer content delivery
- Network storage/backup
- Home monitoring
- Video Conferencing
- Remote desktop

- ◆ **MoCA Technology Must Not Become The Bottleneck In The Home Network**
- ◆ **Next Generation MoCA Must Support ~400Mbps Of Actual Throughput In Less Than 2 Years**
- ◆ **Need A Roadmap To 1Gbps Within 4 Years**
- ◆ **Must Maintain Today's High Performance And Reliability**
- ◆ **Expansion Of MoCA Silicon Supplier Base Is A Must**
